Joaquín Muzzi

joaquindmuzzi@gmail.com | github.com/joaquinmuzzi | linkedin.com/in/joaquinmuzzi | Buenos Aires, Argentina

PROFILE

Junior backend developer with 9+ months of professional experience building REST APIs with Python and FastAPI, modeling NoSQL data on AWS DynamoDB and automating E2E tests with Playwright and Pytest. Computing Technician (graduating December 2026) with Deep Learning training (UTN) and personal audio and machine learning projects. Looking for junior backend roles, remote or hybrid.

SKILLS

Languages: Python, JavaScript, Java, Lua

Backend: FastAPI, Node.js, Express, REST APIs, JWT authentication

Cloud and deployment: AWS (DynamoDB, S3, IAM), Docker, Railway, Netlify

Databases: MySQL, PostgreSQL, DynamoDB, MongoDB, SQL, NoSQL

ML and audio: PyTorch, TensorFlow, Keras, librosa, ffmpeg

Testing and quality: Pytest, Playwright, E2E testing, GitHub Actions (CI), ruff

Tools: Git, GitHub, GitHub Copilot, Cursor, Claude, Opencode, ClickUp, Slack

Methodologies: Agile, Scrum

Spoken languages: Spanish (native); English (advanced, Duolingo English Test: 130)

EXPERIENCE

Backend Developer (part-time, remote) – Planhopper December 2025 – September 2026
Buenos Aires, Argentina

- Developed and maintained REST APIs with Python and FastAPI.
- Integrated and modeled NoSQL data with AWS DynamoDB.
- Designed and implemented, AI-assisted (Opencode and Claude), a suite of 10+ automated E2E tests with Playwright and Pytest, which cut production bug reports by 30%.
- Worked in a remote Agile team using Git, Slack and ClickUp.

PROJECTS

Tonos – Local music analysis with AI October 2026 – present
github.com/joaquinmuzzi/Tonos

Python, FastAPI, PyTorch, librosa, ffmpeg, JavaScript, GitHub Actions

- App that analyzes a song and returns tempo, meter, key and chords bar by bar, with a player that highlights the current chord; runs 100% on the user's computer.
- Audio pipeline that combines beat, key and chord models, with custom logic to fix irregular beats and detect 5/4 and 7/4 meters.
- FastAPI backend with result caching and a CLI; web interface in English and Spanish.
- 25+ pull requests, pytest tests, CI on GitHub Actions, releases 0.1.0 and 0.2.0 with changelog and docs on reliability and licenses.

Lexikon – German→English dictionary (open source, co-creator) October 2026 – present
lexikon.moe | github.com/julianel5/Lexikon

TypeScript, React, Hono, SQLite, Python, Docker, Railway, GitHub Actions

- Fast, ad-free German→English dictionary for learners, with reverse search, sentence breakdown, native audio and grammar tables; co-created with a partner and live at lexikon.moe.
- Reverse search, autocomplete, sentence segmentation and word-frequency ranking; native-speaker audio with a text-to-speech fallback.
- CI with type checks, lint and build on every PR, tests, Dockerfiles, security headers and deployment on Railway.
- 89 commits and 50 pull requests; releases 0.1.0 and 0.2.0.

GsChecker – Discord bot October 2025 – present

github.com/joaquinmuzzi/GsChecker

Python, PostgreSQL, Groq API, GitHub Actions, Railway

- Production bot that looks up Warmane characters and reports raid progress, gear quality and DPS per boss; 200+ commits.
- Memory and PostgreSQL cache, rate limiting with a circuit breaker and AI analysis (/ia).
- Automated tests with pytest and CI on GitHub Actions.

School Reports System (SIE) – Institutional project, E.T. N° 35 March 2026 – present

React, Node.js, Express, MySQL, JWT, Netlify, Railway

- Full-stack web platform in production to manage conduct reports, with 7 roles, a review and closing cycle, student statements and PDF export.
- Led a team of 4: database, infrastructure, deployment and initial MVP.

Techno Mortem Arena August – September 2026

Java, libGDX

- 2D networked (UDP) fencing duel game, final project in a team of 5.

EDUCATION

Escuela Técnica Nº 35 - Ing. E. Latzina – Computing Technician March 2021 – December 2026 (expected)

COURSES AND CERTIFICATIONS

UTN FRBA e-Learning Center – Deep Learning course: Neural networks from scratch (May – July 2026; certificate issued June 2026)

Vocational Training Center Nº 41 – Installation, maintenance, support and technical service of computer systems (March – July 2026; certificate pending)

Talento Tech – Introduction to Programming Using Python (February 2024)

INTERESTS

Pianist and open source contributor in video game modding. Interested in working with a community of native German speakers.
